

HOW TO: use your ring sizer

1. To ensure this document prints at the correct size, do not print from the web. Save the ring sizer first, then go into the saved document and select print. This will ensure it prints to A4 size. Then:

PC - go to 'print' and make sure the 'fit to page' box is unchecked

MAC - go to 'print', then 'page scaling' and ensure 'none' is selected

2. To confirm it has printed to the correct size, measure the lines marked A and B, or fit a pound coin to the serrated circle

3. Cut around the serrated lines and the serrated slit at the top of the sizer - the best way to do this is to fold it in half lengthways, and cut along the serrated edge, so that when you unfold it you will have a single slit in the middle

4. Push the opposite end through the slit and place on the selected finger. Adjust to fit and make sure it can slide on and off comfortably

5. The line will indicate your ring size
