

Safety Recommendations Use and Care:

Always be careful when filling and using hot water bottles

Check the entire hot water bottle, including the stopper for any signs of wear or damage, splits or perishing before use; if the bottle is split or perished, do not use and replace with a new one.

Use a cover or wrap the bottle in a towel before using to help prevent burns.

DO NOT allow direct contact with one area of the body for more than 20 minutes

Never use boiling water to fill your hot water bottle, as this can cause the bottle to split or leak; very hot water is fine.

Do NOT overfill bottle as this may cause it to burst, only ever fill your bottle to a MAXIMUM of two-thirds capacity

Ensure that the funnel is empty

Make sure the top is firmly closed before using.

DO NOT lay or sit on the hot water bottle ouse as a cushion.

DO NOT place anything on top of a hot water bottle whilst in storage.

The use of hot water bottles by babies is not advised and children should be supervised.

Elderly people, and those with sensitive skin or reduced feeling should use hot water bottles with care.

Manufactured to comply with British Safety Standard BS1970:2012
